

# Blossom Bridge Project

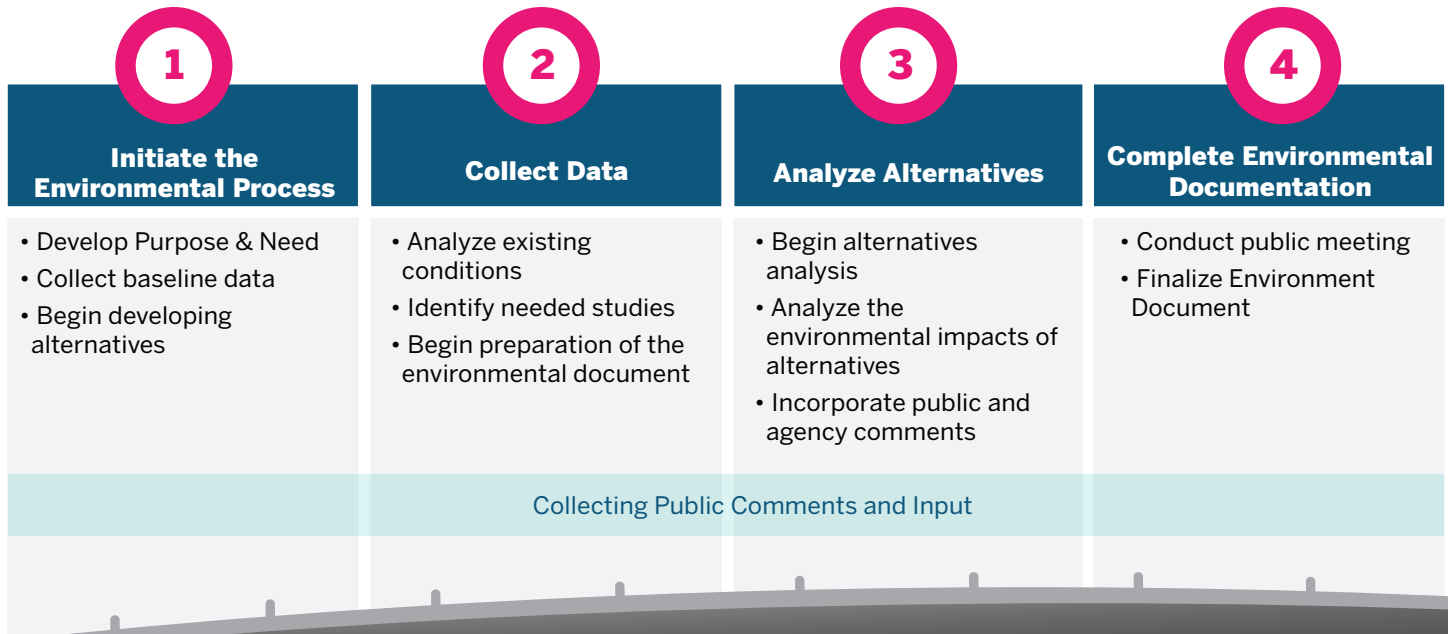

## Purpose and Need

The purpose of the project is to address the structural deficiencies of the existing bridge over Norfolk Southern and CSX Transportation Railroads to meet current standards.

## Environmental Process

A National Environmental Policy Act document is required for projects using federal funds. This process provides for informed decision-making, including partners in the process, and considering a wide variety of factors.

The Environmental Review will examine a number of factors within the study area including:

Land Use

Social & Economic Conditions

Hazardous Waste & Underground Storage Tanks

Cultural Resources

Potential Displacements

Natural Resources & Endangered Species

Parks & Recreational Areas

Air Quality

Floodplains
